Mr. Brian G. Mitchell Environmental Engineer U.S. Environmental Protection Agency 726 Minnesota Avenue Kansas City, Kansas 66101

Subject:

Facility at 3200 Main Street

Keokuk, Iowa

Consent Order [Docket No. VII-91-H-0040]

Dear Mr. Mitchell:

This letter is being provided to U.S. EPA on behalf of United Technologies Automotive Systems, Inc. (UTAS). Rick Meyer of UTAS recently sent you a letter dated October 9, 1997. The letter indicated that the June 1997 groundwater monitoring report would be provided to U.S. EPA by the end of October of this year. In addition, UTAS was going to provide U.S. EPA with a courtesy copy of the scope of work for additional investigation activities at monitoring well MW-20 and total organic carbon sampling (TOC) to support calculation of cleanup goals. Woodward-Clyde advised Rick Meyer on the schedule for those deliverables, however, we did not account for including the results of the October 1997 resampling of well MW-20 in the groundwater monitoring report. Well MW-20 was resampled on October 16, 1997. Analytical results will be received from the analytical laboratory by November 7, 1997. We would like to include the results of the October 1997 resampling of MW-20 in the groundwater monitoring report. With your consent, the schedule will be modified and the combined groundwater monitoring report submitted to U.S. EPA on November 17, 1997.

A copy of the proposed plan for the MW-20 source investigation and TOC sampling to support cleanup goals calculations will also be included with the groundwater monitoring report. The October 9, 1997 letter from Rick Meyer to U.S. EPA stated that we wish to complete field work prior to the Thanksgiving holiday. However, we would like to request that U.S. EPA review and approve the proposed investigation plan prior to starting the field work. Consequently, we will submit a revised schedule in the proposed investigation plan.

Mr. Brian G. Mitchell U.S. Environmental Protection Agency October 28, 1997 Page 2

If you have any questions, please feel free to contact Rick Meyer at (860) 728-7586.

Sincerely,
